1	Installation	3
1.1	Ubuntu 10.04	3
1.2	Windows	3
2	Configuration and Maintenance	3
2.1	Database	3
2.1.1	Creating database	3
2.1.2	Maintenance	3

1 Installation

1.1 Ubuntu 10.04

```
sudo apt-get install libboost1.40-dev libboost-all-dev libmxml-dev python-setuptools  
python-qt4 libmysql++-dev mysql-server-5.1 libcryptopp*  
sudo python_egg mxml
```

1.2 Windows

Client only: Package python 2.6.5, python-setuptools and Qt4 Python package
python_egg mxml

2 Configuration and Maintenance

2.1 Database

2.1.1 Creating database

This step need to be taken before you run server for the first time.
Reset will be done automaticlly by server.

```
~$ mysql -u root -p  
mysql>create database SharedBase;  
use SharedBase;
```

2.1.2 Maintenance

Viewing database and tables:

- describe SharedBase;
- describe SharedFiles;
- describe BannedList;

Viewing content in tables:

- select * from SharedFiles;
- select * from BannedList;

Dropping tables:

- drop table SharedFiles;
- drop table BannedList;
